- Calculating descriptive statistics Expect questions requiring you to calculate the mean median standard deviation and IQR from a dataset
- Identifying outliers Youll need to be able to identify outliers using the IQR method or other 3 techniques
- Comparing distributions You might be asked to compare two or more distributions based on their graphical representations or numerical summaries
- Contextual interpretation Many questions will require you to interpret statistical findings in the context of a realworld problem

Beyond the Test The Bigger Picture The AP Statistics exam emphasizes understanding and application not rote memorization Mastering Chapter 2 is crucial for success not only on Test 2C but also on the overall AP exam The skills you learn in this chapter describing data visualizing data and interpreting
